If you feel that your system does not run the games or programs smoothly, after you've updated your operating system or updated your graphics driver, it is possible that your sound card does not work properly, which will also cause problems with your hardware games, software, programs, and multimedia players. To check whether your sound card is installed properly and running smoothly, simply click the driver that is recommended for you, and click "Install Now" to install it. If your sound card is not functioning properly, then you need to select a driver. Open my computer in case you have to go to the specific driver that is running so you can get it. If you have this kind of sound card: This is the typical form of sound cards. Some things you can do if this is the sound card you use: 1. If you are using Windows 10, try uninstalling the driver, and try installing it again. This will most likely be the problem. 2. If you are using Windows 7, try cleaning the sound card. In your case, your sound card uses an ADI device and you should be able to simply unplug your microphone jack and plug it back in to reconnect to the microphone. 3. If you are using Windows 8, you have to disable the volume mixer, and you should be able to unplug and plug your microphone jack to solve this issue. 4. If you are using Windows 8.1, you should try opening up the Windows audio mixer and disable the audio output devices. 5. If you are using Windows 8.1, and you are not connected to a Wi-Fi, try uninstalling and reinstalling your sound card. 6. If you are using Windows 8.1, you should try using a different Sound Card Driver. Checking sound card driver compatibility You can use the DriverScanner™ as well as the Driver Talent™ to see if the sound card that you are using is compatible with your system. This will show you if the sound card that you are using is compatible with your operating system. If you are using Windows 7 1. Open the Start menu 2. Click on the "Control Panel" 3. Click on the "Hardware and Sound" 4. Click on the "Device Manager" 5. Expand the section named "Sound, video, and 82157476af
